MESSAGE

We are glad to know that International Benevolent Research Foundation, Kolkata has decided to launch a six months Certificate in Research Methodology and Systems Analysis (CRMSA) with a view to empowering the students contemplating to pursue M.Phil. / Ph.D. and other Post Doctoral Programmes.

We are sure that the formal, informal and nonformal training in the selected areas of research methodology and systems analysis will enable the researchers in acquiring expert knowledge of the critical path for collecting information and analysing the same optimally in the fields of science and technology, applied and liberal arts, social sciences, education, management, health, hygiene and allied medical sciences etc.

The detailed curriculum for the CRMSA has been analysed by the team of experts and accordingly it has been observed that the contents of this course have a wider coverage than other training programmes being organised by other institutions from time to time.

We suggest that International Benevolent Research Foundation, Kolkata should evolve a neological as well as a neocratic approach to the teaching methodology for CRMSA course so that the students completing this course may throw themselves into a new environment with full of zeal and enthusiasm so that the Central / Federal and the State / Provincial Governments, Public and Private Sector Organisations, International Bodies, Universities and Institutions of National and International Importance may use their knowledge to the fullest extent of their abilities in the long run.

We wish the action programmes being envisaged by the International Benevolent Research Foundation, Kolkata a grand success.

5th October 2016
World Teachers Day

Dr. Priya Ranjan Trivedi
