Message

The prime focus of Institutions of Higher learning is Research, Innovation, Creativity and New Knowledge. Only through discovery and innovations civilizations changes their dimensions from time to time, and today what we are and the way we live is because of this. In 2009 University Grants Commission has made "Research methodology" a compulsory course for undertaking research work leading to Ph.D. in all Universities of India. Systematic knowledge on Research methods empower a student to streamline their thought how to progress to achieve the objectives.

I am happy to learn that the International Benevolent Research Foundation of Kolkata is launching a six months Certificate Course on "Research Methodology and Systems Analysis" on the World Teacher's day, 2016. I am sure this initiative of the Foundation would immensely help the young researchers of our Universities and Research Institutions to motivate and strengthen their research career.

I wish all success in this endeavor.

(S.P. Adhikary)
