Message

I am immensely pleased to know that the International Benevolent Research Foundation, Kolkata (West Bengal) is going to launch Six Months Certificate Course on “*Research Methodology and System Analysis*” from October 5, 2016 at Science City Auditorium, Kolkata, West Bengal. The 5th October is the World Teachers Day and there can not be any other day so pious and perfect for launching this programme.

It is often found that even a very relevant research theme fails to derive holistic and meaningful result due to lack of the application of appropriate research methodology and data analysis. Your approach to find logical solution of this problem will definitely upgrade the research quality in the country. Consequently, a quality researcher may even emerge as a job giver rather job seeker. I am sure this decision of the Foundation is a great step towards making India as a hub of quality researchers and that will ultimately contribute in solving the prevailing socio-economic problems of the country. My kudos to you all and good wishes for the success of the proposed 6 month certificate course on Research Methodology and System Analysis.
